

CORE FEATURES

- ☛ The chassis is fabricated from 8mm thickness tubes and are pressure tested before protective dip coating, to provide extended life.
- ☛ The complete pump end is dipped in a corrosion proof chemical/paint to protect the unit from aggressive weather conditions.
- ☛ All the joints/gaskets are made from high quality rubber sheets with cotton lining to ensure extended life. Gaskets used in areas where there is contact with oil and grease are made from oil resistant rubber sheet with nylon lining to avoid leakages.
- ☛ The complete unit is tested in our own facility under the stringent standards set by our Quality Control Team.
- ☛ The Volute is made of High Grade Cast Iron and dipped inside out in protective solution to provide longer lifespan.
- ☛ All the internals used on the pumps are phosphorous bronze, individually tested by our QC Department.
- ☛ Stainless Steel grade Studs/Nuts/Bolts/Washers are used as standard in Appold pumps. The base of the pumps comes with automotive grade fasteners which has got more than 720 hours salt spray resistance. The above will enable the end user to open up the units with ease without resorting to WD40 or similar for several years.

APPOLD PUMPS SETTING NEW STANDARDS

Appold Pump offers the extended life specification as standard to meet the ever demanding improved performance. The AP Range from Appold Pumps are General Purpose pumps capable of sump pumping, sewage/over-pumping, well pointing and clean water application. The current range of 6 inch Pump offered by Appold Pumps are capable of meeting the market demands for varied application.

The complete pump end is manufactured in our own facility and are tested at various stages of production to ensure high quality.

BENEFITS OF APPOLD PUMPS

- Fast automatic priming and re-priming
- Heavy Duty Pump Bearings
- Phosphorous Bronze Internals
- Heavy Duty Pump Volute with special coating
- Easy on-site handling
- Gland Packing System
- Built-in Fuel Tank

CAPABILITIES

- Sump Pumping
- Capable of handling slurry and Semi solid materials
- Well pointing
- Dry Running
- Round the clock reliability
- Suitable for high ambient conditions

AP 150-60
